Pregunta 1:

What is the symbol to create a comment on a line?

☐ !

☐ @

☐ ^

☒ #

Pregunta 2:

How should a constant be written?

☐ In all lowercase letters, like a variable

☒ In all uppercase letters

☐ Begin with \$ symbol and follow it with the name

Pregunta 3:

What does the `.length` method return when called on a String object?

☐ The number of seconds it takes to type the string

☐ The number of lines of code in the Ruby file

☒ The number of characters in the String

☐ The number of alphabetic letters in the String

Pregunta 4:

What does the `.upcase` method do when called on a String?

- ☒ Capitalize **all** the letters in the String.
- ☐ Capitalize the **first** letter in the String.
- ☐ Capitalize **all** the letters in the String and remove all non-alphabetic characters.

Pregunta 5:

What is the proper syntax if I wanted to interpolate the `month` variable below into a string output?

```
month = "April"
```

- ☐ `puts "The current month is #{month}"`
- ☒ `puts "The current month is #{month}"`
- ☐ `puts "The current month is #(month)"`
- ☐ `puts "The current month is {#month}"`

Pregunta 6:

What does the `gets` method do?

- ☒ Retrieves input from the user running the program.
- ☐ Gets a Ruby file from the same directory and loads it into the current file.
- ☐ Gets documentation for the object / method that follows the `gets` keyword

Pregunta 7:

Why is it common to call the `.chomp` method after calling the `.gets` method?

- ☐ It removes all non-alphabetic characters from the string
- ☐ It converts the string to an integer.
- ☒ It removes the newline character in the input string that is created from pressing the Enter key.
- ☐ It removes all extra spaces from the string input

¡Buen trabajo! Ya estás listo para pasar a la siguiente clase.
