

Pregunta 1:

What is the **Enumerable** module?

☐ A built-in Ruby module that can be mixed in to add comparable functionalities

☐ A built-in Ruby module that can be mixed in to add date and time-related functionalities

☒ A built-in Ruby module that can be mixed in to add iteration functionalities

☐ A built-in Ruby module that can be mixed in to add math-related functionalities

Pregunta 2:

```
1 module A
2   def speak
3     "You know the deal!"
4   end
5 end
6
7 class B
8   include A
9
10  def speak
11    "It is what it is!"
12  end
13 end
14
15 obj = B.new
16 obj.speak
```

☐ "You know the deal!"

☒ "It is what it is!"

Pregunta 3:

```
1 module A
2   def speak
3     "You know the deal!"
4   end
5 end
6
7 class B
8   prepend A
9
10  def speak
11    "It is what it is!"
12  end
13 end
14
15 obj = B.new
16 obj.speak
```

☒ "You know the deal!"

☐ "It is what it is!"

Pregunta 4:

What is the **.ancestors** method called on?

☐ Objects created from a class.

☒ The class itself.

¡Buen trabajo! Ya estás listo para pasar a la siguiente clase.

Has acertado 4 de 4.

✓ Lo que sabes 0

What is the `Enumerable` module?

module A def speak "You know the deal!" end end class B include A def speak "It is what it is!" end end...

module A def speak "You know the deal!" end end class B prepend A def speak "It is what it is!" end e...

What is the `.ancestors` method called on?
